

Vasileios Chronas

Post-graduate Student at AUEB

Economics Student at the Athens University Of Economics And Business, interested in Econometrics and Data Analysis. I am a highly motivated individual with a primary objective to continuously expand my knowledge. I am eager to use Economic Theory, as well as Statistical and Econometric techniques in order to draw meaningful conclusions from Data.

Experience

Economic Research Intern

Foundation for Industrial and Economic Research (IOBE) Athens

January 2019 - June 2019

As an Intern I extracted Data from numerous databases (including Eurostat, Hellenic Statistical Authority etc), applied statistical techniques in order to gain insights from the data and presented my findings in a clear and succinct way.

Worked on the Greek Economy report as well as on other research projects. I analyzed loads of Data from the Hellenic Statistical Authority in order to establish whether there was casual relationship between wage reduction and employment for each sector of the Greek Economy during the Greek recession.
